RESEARCH & ACTIVITY

Research in biomechanics and kinematics of ankles in young people

Research in biomaterial like bioactive glass and hydroxyapatite coating in hip surgery

Research in biomaterial like composite materials (polyetherimide) to be implanted in rabbits bone's

Research in spine biomechanics and kinematics

Research in hip biomechanics and kinematics

Research in Knee biomechanics and kinematics

Research in external fixation.

SURGERY EXPERIENCE

Treatment of adult patients with lumbosacral spine problems, including spine deformities (scoliosis, kyphotic deformities and spondylolisthesis), spinal trauma, spinal instabilities, herniated discs, degenerative and developmental conditions (such as spinal stenosis), spinal infections and tumors. Techniques with intervertebral spacers, balloon kyphoplasty, coblation disc lumbar, pedicular screw and cages.

Treatment of adult patients with shoulder, hip, knee, hand prostheses.

Treatment of adult patients fractures.

Limb lengthening.

SURGICAL EXPERIENCE

Considerable experience as a leading operator in the field of election as in emergency-emergency conditions:

-In traumatology: use of intramedullary fixation, the low-profile plates, external fixation; experience for all anatomic regions;

-In prosthetic surgery: (hip, knee, shoulder, hand) use of traditional and innovative techniques;

-In the lumbar spine surgery: use of pedicle screws, cages interbody, rigid stabilization and hybrid;

-Initial experience in oncological surgery through the use of implants to large resections of the hip and knee.

He performed as the first operator more 2000 surgeries certificates, participating in twice as many surgeries as an aid: 306 interventions at the Catholic University of Rome, 29 at the Harvard Medical in Boston, at 110 Alba (Cn), at 388 Galatina (The); 899 Gallipoli ((Le), 269 Casarano (Le).

Surgical case series of 1850 surgical interventions includes:
